

Diego Silva

Full Stack Java Developer – Semi Senior

📍 San José de Mayo, Uruguay ✉️ diego1silva2@gmail.com ☎️ 097 257 167

About Me

Full Stack Web Developer specialized in Java with Semi-Senior level experience. With over 10 years in software development, I am passionate about building robust and secure technological solutions, especially in the areas of digital identity and electronic signature.

Throughout my career, I have developed a strong ability to analyze complex problems, design scalable architectures, and lead successful technological migrations. My approach combines technical rigor with a practical, business-oriented mindset.

I am a proactive professional with a high capacity to adapt to new challenges and technologies, always focused on optimizing processes and improving software quality.

Detailed Experience

ISA INTERFASE (6+ years) , Full Stack Developer – Digital Security Specialist Development of digital identity, electronic signature, and secure authentication solutions • Led the development and maintenance of digital signature applications integrated with external authentication systems such as Antel TuID • Developed the MiRecibo platform for digital signing of payroll receipts, with role-based access and company-level configurations • Creation and management of digital certificates for secure signing of PDF and XML documents • Implementation of OAuth2 authentication services and development of secure APIs for critical applications • Integration with HSMs (Hardware Security Modules) to automate certificate issuance, signing, and revocation • Active participation in the architectural evolution toward microservices and distributed systems • Worked in production environments with high availability and strict security requirements	Montevideo, Uruguay 2019 – 2025
Beacon42 , Magento Developer – eCommerce Specialist Development of customized eCommerce solutions for Magento • Developed a Magento plugin from scratch to manage billing workflows • Implemented custom integrations for eCommerce platforms • Gained deep knowledge of the Magento ecosystem and eCommerce architectures • Collaborated in the growth of a fast-scaling startup	Montevideo, Uruguay 2018 – 2019
Portlike , Programmer Analyst – Web Development & Analysis First professional experience combining web development and data analysis • Started as a Programmer Analyst, analyzing metrics and statistics using Google Analytics • Generated reports and user behavior tracking with Google Tag Manager • Created graphical Excel reports to support executive decision-making • Maintained a Lumen (Laravel) project after demonstrating strong JavaScript skills • Transitioned into the web development team, working mainly with WordPress • Maintained and fixed bugs across multiple corporate client websites	Montevideo, Uruguay 2017 – 2018

Professional Journey

2017–2018: Professional beginnings at Portlike combining web analysis and development

2018–2019: Specialization in eCommerce with Magento at Beacon42

2019–2025: Over 6 years at ISA INTERFASE as a digital security specialist

Growth: From junior developer to semi-senior with technical leadership in critical projects

Key Achievements

Over 6 years of continuous experience in digital security and electronic signature solutions

Successful migration of multiple critical technologies (MySQL → PostgreSQL, Java 8 → 11, etc.)

Implementation of high-availability systems using HSMs for certificate security

Development of enterprise platforms used by multiple organizations

Proven ability to grow from analyst roles to specialized developer positions

Specializations

Digital Security & Cryptography: Electronic signature, digital certificates, HSM, OAuth2, multi-factor authentication

Java Backend Development: Spring Boot, REST APIs, microservices, relational databases, security

Enterprise Systems: Digital signature platforms, document management, high-availability systems

Technology Integration: Technology migrations, legacy system integration, architecture modernization

Education

Faculty of Engineering (UDELAR) & UTU , Computer Science Technologist	Uruguay
Joint university program combining theoretical foundations with practical application. Comprehensive training in software development, system architectures, and technology project management.	2013 – 2015

Universidad del Trabajo del Uruguay (UTU) , Technical High School Degree in Electromechanics	Uruguay
Technical background in electromechanical systems that strengthened logical thinking and complex problem-solving skills.	2007 – 2009

Technologies Expertise

Backend & Security: Java, Spring Boot, HSM, OAuth2, JWT, PostgreSQL, MySQL, REST/SOAP APIs

Frontend & Web: ReactJS, AngularJS, JavaScript, HTML/CSS, Thymeleaf, WordPress, Magento

Infrastructure & DevOps: Wildfly, Tomcat, Docker, GitLab, Maven, Gradle, Log4j, OpenAPI

Tools & Methodologies: Google Analytics, Google Tag Manager, Advanced Excel, Scrum, Git

Core Skills

Technical Leadership: Ability to guide technology migrations and architectural evolution

Problem Solving: Analytical approach to complex technical challenges

Adaptability: Successful transitions across roles and technologies

Teamwork: Effective collaboration in multidisciplinary teams

Technical Communication: Ability to explain complex concepts to diverse audiences

Results-Oriented: Practical focus on delivering business value

Significant Projects

ISCERT System: Comprehensive digital identity solution with authentication, electronic signature, and certificate management

MiRecibo: Enterprise platform for digital payroll signing with roles, configurable templates, and secure storage

FirmaPDF: Web application for mass digital signing of PDF documents with external system integration

Magento Billing Plugin: Custom billing solution for Magento-based eCommerce platforms

Professional Outlook

Seeking to continue growing as a specialist in digital security and enterprise systems
Interested in challenging projects involving distributed architectures and high scalability
Motivated to contribute experience in technology migrations and system modernization
Value environments that promote continuous learning and technological innovation

Personal Information

Age: 33

Nationality: Uruguayan

Marital Status: Single

Date of Birth: February 20, 1992

ID Number: 4.860.251-1

Availability: Immediate

Mobility: Available for travel within Uruguay
