

Diego Silva

Semi-Senior Java Full Stack Developer

diego1silva2@gmail.com 097 257 167

About Me

Full Stack Developer with over 6 years of experience, specialized in Java and Spring Boot for REST APIs, microservices, and secure backends. Additional experience with React and Angular (TypeScript), as well as software test automation using Java, Selenium, and TestNG. Experience working on digital identity, electronic signature, and authentication solutions.

Focused on solving real-world problems, participating in technology migrations, and delivering high-quality software. I use AI tools daily to increase productivity and have knowledge of AI Harness Engineering.

Detailed Experience

Software Testing Center (CES), Software Tester - Test Automation — Uruguay
Software testing and test automation for web applications — Oct 2026 – present

- Development and execution of automated tests using Java, Selenium, and TestNG
- Contributing to software quality through test automation

ISA INTERFASE (6 years, 9 months), Full Stack Developer - Digital Security Specialist — Montevideo, Uruguay
Digital identity, electronic signature, and secure authentication solutions — Dec 2018 – Sept 2025

- Development and maintenance of digital signature applications integrated with TuID (Antel), using Java, Spring Boot, REST APIs, and OpenAPI/Swagger
- Development of MiRecibo: a digital payslip signing platform with company-specific roles and configurations
- Management of digital certificates (CA) and HSM integration for certificate issuance, signing, and key protection
- Securing REST endpoints using JWT and OAuth2
- Frontend development with Angular and React; Spring Boot backends deployed as executable JARs on WildFly and Tomcat
- MySQL to PostgreSQL migrations and monolith-to-microservices migrations, including database separation
- Linux deployments using systemctl, environment variables, and Log4j; testing with Postman, JMeter, JUnit, and Mockito
- Working in small teams using Scrum (2-week sprints), Jira, and Confluence

Beacon42 (4 months), Magento Developer — Montevideo, Uruguay
Custom eCommerce solutions — Aug 2018 – Dec 2018

- Developed a Magento plugin from scratch for invoice management
- Custom integrations on Magento and work within the PHP/eCommerce ecosystem
- Contributed to the growth of an expanding startup

Portlike (1 year, 1 month), PHP Web Developer — Montevideo, Uruguay
Development and maintenance of PHP web applications — Jan 2017 – Feb 2018

- Development and maintenance of applications using Lumen (Laravel) and WordPress
- Main client: DIRECTV
- Bug fixing and implementation of improvements to corporate client websites

Education

Faculty of Engineering (UDELAR) & UTU (3 years), Information Technology Technologist — Uruguay
Comprehensive training in software development, system architecture, and project management. — Mar 2013 – Dec 2015

Universidad del Trabajo del Uruguay (UTU) (3 years), Technical Baccalaureate in Electromechanics — Uruguay, Mar 2007 – Dec 2009

Technical Expertise

Backend and Security: Java, Spring Boot, HSM, OAuth2, JWT, PostgreSQL, MySQL, REST/SOAP APIs, PHP, OpenAPI, Swagger, Maven, Gradle, Log4j

Testing and Test Automation: Selenium, TestNG, JUnit, Mockito, Postman, JMeter

Frontend and Web: React, Angular, TypeScript, JavaScript, HTML/CSS, Thymeleaf, WordPress, Magento

Infrastructure and DevOps: WildFly, Tomcat, Docker, GitHub/GitLab, AWS, Linux, Jenkins

Tools and Methodologies: Scrum, Jira, Confluence, Git, Microsoft Teams, Slack, Postman

Key Competencies

Problem Solving: Analytical approach to complex technical challenges

Adaptability: Successful transition between roles and technologies

Teamwork: Effective collaboration in multidisciplinary teams

Results-Oriented: Practical approach to delivering value

Professional Goals

Seeking a stable position that allows me to grow professionally in a positive and collaborative environment

Interested in software development, test automation, quality assurance, scalable architectures, and system modernization

Open to different domains, including fintech, digital products, and enterprise solutions

Value environments that foster continuous learning and long-term technical growth

Personal Information

Date of Birth: February 20, 1992

Age: 34 years

Nationality: Uruguayan

National ID: 4.860.251-1

Driver's License: Category E (taxis)
